

Toppy Ph Adv is electric-powered portable pallet inverter designed to exchange pallets for miscellaneous loads.

Its control panel is user-friendly, and its portability makes it ideal for small and confined warehouses without dedicated pallet-changing areas.

Originally designed from scratch in 1995 by the CEO of Topy Group, it has been tested and improved over the years.

- For a wide range of load types;
- +5.000 sold worldwide;
- Safe product handling.

Pallet size Up to 1200x1200 mm

Capacity Up to 1000 Kg

Performance About 20 pallets/hour with double rotation

Data are indicative and may vary depending on machine configuration.
